## **DETAILED ACTION**

### ***Election/Restrictions***

1. This application is in condition for allowance except for the presence of claims 8-26 drawn to an invention non-elected without traverse. Accordingly, claims 8-26 have been cancelled.
2. Claims 8-26 withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 01 December 2005.

### ***Allowable Subject Matter***

3. Claims 1-7 are allowed.
4. The following is an examiner's statement of reasons for allowance: The prior art does not disclose nor render obvious an osmolarity measuring system comprising a processing device configured to measure the intrinsic conductivity for a plurality of electrodes, and to calibrate determined electrical properties using measured intrinsic conductivities, in combination with all other limitations of the independent claim. The closest prior art reference found is Wolf et al. (U.S. Patent Number 5,851,489), which does not have the above limitations with regard to the processing device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

**Conclusion**

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The examiner has cited references deemed relevant to the general state of the art of the present invention.
